

Statistical Information

Statistical Introduction

THE YEAR IN REVIEW 1999

STATISTICAL SUMMARY IS ISSUED BY
THE LOS ANGELES COUNTY SHERIFF'S

DEPARTMENT AS A MEANS OF
EVALUATING THE EFFECTIVENESS OF

CURRENT PROCEDURES AND AS A
REFERENCE FOR FUTURE

DEVELOPMENT OF THE DEPARTMENT.

THE FOLLOWING IS A CLARIFICATION
OF THE TERMS USED IN THE

SUMMARY.

TOTALS MAY VARY FROM PREVIOUSLY
PUBLISHED FIGURES. THIS IS DUE TO

THE CONTINUAL UPDATING OF EVENT
INDEX SYSTEM RECORDS AND THE

EFFORTS TO PRESENT THE MOST
CURRENT DATA.

CRIME RATES

Crime rates in this summary are based on a population of 10,000 rather than 100,000 as in the State of California and Federal Bureau of Investigation reports. This makes the rates more significant in view of the population distribution in the various station and contract city areas. The crime rate is calculated as follows:

$$\frac{\text{NUMBER OF CRIMES IN AREA}}{\text{POPULATION IN AREA}} \times 10,000 = \text{CRIME RATE}$$

COMPARISONS

Factors contributing to crime are numerous and vary from place to place. Readers are cautioned against drawing conclusions from direct comparisons of crime figures between individual communities of similar populations and size. In Los Angeles County, a jurisdiction in excess of eight million population, several factors affect the rate of crime. The factors include:

- Crime reporting practices of citizens
- Solid economic factors

Statistical Introduction

- **Demographics of the population, including age, sex, race, and ethnicity**
- **Population density and community characteristics: commercial, educational, recreational, and economic**
- **Public attitude toward crime and law enforcement**
- **Number of police employees per unit of population**
- **Policies of prosecuting officials and courts**

In evaluating percentage changes, consideration must be given to the dates during which changes took place, as well as the actual number of crimes upon which the percentage is based.

POPULATION

Unincorporated area population figures were obtained from the 1998 Census Demographic Report published by the Claritas Corporation, Ithaca, New York. Contract city population figures were obtained from the January 1998 Department of Finance figures.

AREA

The square mileage of contract cities and unincorporated areas have been re-calculated using a new digital map provided by Los Angeles County Urban Research.

PART I OFFENSES

The Part I Offenses are used by law enforcement agencies in the United States to reveal the extent and trend of criminal activity. Any significant change from the anticipated pattern of the figures alerts law enforcement administrators to possible problem areas. The Part I Offenses are Criminal Homicide, Forcible Rape, Robbery, Aggravated Assault, Burglary, Larceny Theft, Grand Theft Auto, and Arson.

The Sheriff's Department tabulates Part I Offenses by Uniform Crime Report standards and maintains statistical files with regard to violations, locations of occurrences, arrests by age and sex of the offenders, and by disposition of incidents (cases). Only the most serious classification is tabulated from reports with multiple classifications. For example, if a suspect is charged with burglary and vandalism, only the burglary (the most serious crime) is included in the statistics. However, if several persons together commit one crime, each person is counted in "Adults Arrested" but only one crime is counted in "Reported Incidents." Thus, statistics maintained by each of the stations or bureaus may differ from those recorded in this summary. Additionally, for the crimes of homicide, forcible rape, and aggravated assault, the "Reported Incidents" column actually refers to the number of victims as opposed to the number of incidents. This procedure is in compliance with the Bureau of Criminal Statistics' Uniform Crime Reporting (UCR) guidelines.

PERCENTAGE COMPARISONS

Whenever the availability of data permits, percentage changes are indicated. These percentages reflect increases or decreases in the total number of incidents. It must be noted that these changes do not adequately reflect changes in manpower expended. It is, in fact, possible for a decrease in incidents to represent an increase in man-hours expended.

TRAFFIC STATISTICS

The figures obtained from Traffic Services Detail were based on data submitted by each station.

STOLEN AND RECOVERED PROPERTY

The monetary value of property stolen and recovered has been changed to the type of property stolen instead of property loss by crime classification.
