COPLINK NATIONAL DATA EXCHANGE INTERFACE

The Los Angeles County Sheriff's Department contracted with COPLINK to create an interface between COPLINK nodes and the FBI's N-DEx system.

The agreement allows for any state, county, city or the like entity managing an individual or regional COPLINK node to connect to and share data with N-DEx.

COPLINK is a computer-based system that makes it easier for law enforcement officials and detectives to sift, search, filter, and view large quantities of crime, suspect, and incident data via an easy-to-use visual interface.

Links and Forms

- [How to Apply](#) - A fact sheet that lists requirements, exclusions, priorities, and registration steps.

- [List of Connected Nodes](#) - Participants from around the country and their current status

- [Registration Form](#) - An N-DEx application form in PDF format. Various email options are given when you are ready to submit the form.

- [General information on the FBI N-DEx Program](#) - The Law Enforcement National Data Exchange (N-DEx) is an important information-sharing tool used by criminal justice professionals to put the right information into the right hands as quick as possible.

- [Vendor information on COPLINK](#) - IBM i2 COPLINK™ organizes vast quantities of seemingly unrelated data to provide tactical, strategic and command-level users with access to shared data in a single, or multiple, consolidated repositories.
